

SQL module 5 Assessment

You have been employed as a Data Analyst the police force in your community.
The department needs your data prowess to help them answer some questions.

You have been provided with the SQL Database File

Using the DB, proceed to answer the following questions.

Question 1. [10 Marks]

We have been able to identify Jeremy Bowers as the culprit behind the crime that took place in January, in SQL City. The Police force is now working to get who hired Jeremy Bowers.

Start by identifying Jeremy's details from the person's table and look up the ID in transcript column of the Interview Table.

Who hired Jeremy Bowers?

[Hint]: You'd need to profile Jeremy Bowers details in the person table.

Question 2. [5 marks]

One of the goals of the force this year is to promote safe driving. The department is thinking on creating some targeted awareness towards this cause. Please identify the **top 20** highest earning individuals in the community.

It would be nice if you can show us in the table the following:

Their name, their address, their age, gender, the type of car they drive. Do not include their annual income please.

[Expected Output Sample]

Name	Address	Age	Gender	Car Type
Toyin Tomato	Allen Avenue	33	f	Hyundia
Michael Schofield	Fox River	32	m	Ford
Liquid Metal	Abidoshaker	38	m	Toyota

Question 3.

The government is planning on promoting fitness. But they will need to know some facts about the fitness centre in the DB.

a. How **many** people go to the gym daily?

[Expected Output Sample]

Date	Number of people in gym
1 01 2018	30
2 01 2018	20
3 01 2018	40
4 01 2018	23
5 01 2018	12

Please, save all your queries in one script.

Kindly save your script with your registered name or student ID

e.g. Ciroma Chukwuma Adekunle SQL file or WSD-007

Please note that the [Expected Sample Output] is only telling you the format of what your result should be. The data in the expected output is not related to the DB you are querying. It's just an example.

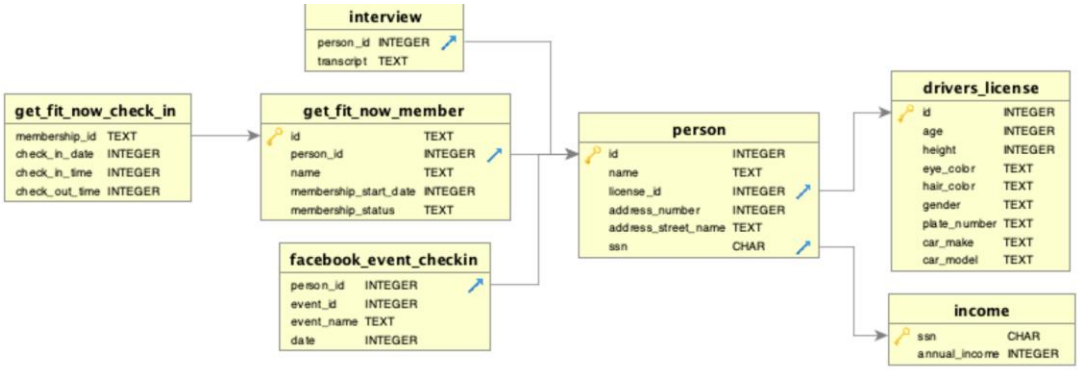

You may need to restore the DB file if you have not already done so.

DB Schema is below.

Submission deadline: Friday 14th November 2026

link to submit assessment: https://forms.gle/SMqbvEAvDLnTBb167

When you are done with this assessment feel free to share your learning on Instagram/Facebook/Linkedin ensure to tag us (Welup Digital) on the post. Thanks.
